## Summary

Frontend:

- TypeScript, JavaScript (ES6+)
- React, Next.js
- Redux, Thunk / Mobx / Apollo
- GraphQL
- ESLint, Prettier
- SCSS / CSS Modules / styled-components / material-ui / bootstrap
- Webpack / Gulp
- Telegraf.js

Backend:

- NodeJS (Express / Fastify)
- WebSocket / WebRTC

DB:

- SQL (MySQL, PostgreSQL, H2)

The projects I've worked on can be found here:

<https://www.h4x0rlol.me/>

Also:

- Participated in the development of a radio line control manager at the Research Institute, wrote an intermediate API in Python for communication between the controller (via TCP connections) and the client.
- Long experience of using and configuring Linux systems, experience with git.
- Teamwork experience (Jira, Trello).

- Experience with bundlers (Webpack, Gulp).
- Little experience in developing applications using cryptocurrencies, decentralized applications based on smart contracts.
- Koltin (koltin-react, exposed, ktor, little experience in native development). Mainly used for university projects.
- C, Shell (small programs/ scripts, shell scripts for unix systems). For example: <https://github.com/h4x0rlol/archlinux-ryzen-setup>
- Knowledge of Matlab language
- Knowledge of English, areas of linear algebra and mathematical analysis. Was a judge in the "Hot Keys" programming competition from the Makhaon Center for Continuing Education
